

■ **INSTALLATION:** To be installed by a licensed plumber. Installation recommended as per regional council plumbing specifications and codes. Additional back flow device may be required.

■ **ELECTRICAL:** Standard 10AMP power point supply required.

■ **CLEANING:** Use of cleaning agents or chemicals other than mild dishwashing detergent will cause cracking or discolouration and failure of the anti-microbial coatings.

1 Check prior to installation (This may differ from the product specification).

A Installation: Space

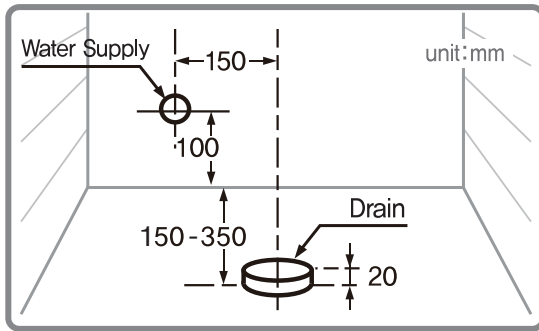

- Secure enough installation space in the bathroom and check whether it disturbs the bathroom door.
- Secure water outlet at least 150mm away from the floor.
- It can cause the discolouration of the wall.

- Check whether the water supply pipe and drain pipe are in the required position before installation.

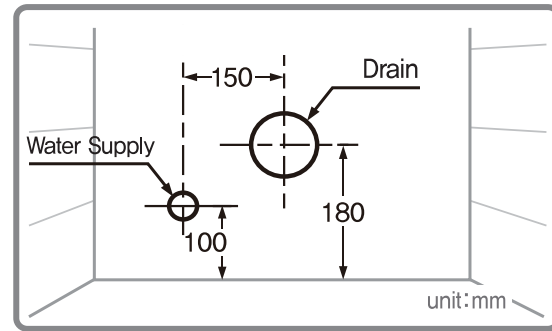

- Make sure the PVC drain pipe, when connecting to the trap, is 20mm high and horizontal.

This is applied for the floor drain (S Trap) type.

Floor Drain Installation Space

Wall Drain Installation Space

B Installation: Water Pressure

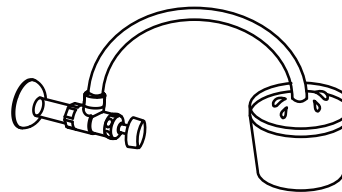

- The product requires a minimum 150 kPa of water pressure and a minimum flow of 20L/min.

Flow of less than 20L/min may not flush correctly leaving waste in the bowl.

- Minimum water pressure is to be maintained during multiple device water use.

- Plumbing code states 500 kPa for max. household pressure. Product tested to maximum 750 kPa.

1. Prepare a 9L bucket.

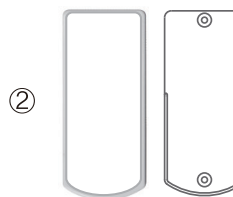

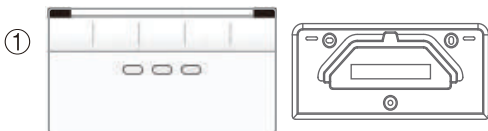

If the bucket fills completely in 18 seconds or less the bidet can be installed.

2. Open the valve all the way.

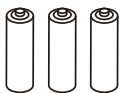

Checking minimum water pressure: If you do not have access to the water meter, follow the directions illustrated above.

2 Accessories (This may differ from the product specification).

Remote control & Bracket (double-sided tape is included)

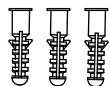

※ ①, ② one of these will be included. (Remote control type only)

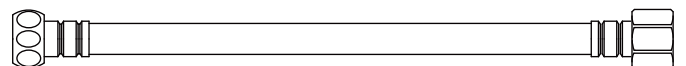

Battery

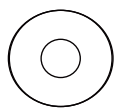

Screw(Optional)

Plastic anchor(Optional)

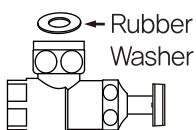

Water Hose

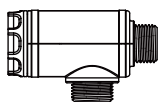

Ring Plate

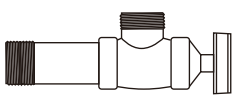

Water Pipe

Water Shutoff Valve(Optional)

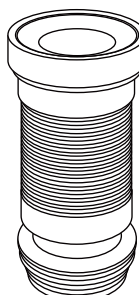

Water filter(Strainer) (Optional)

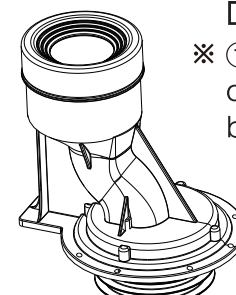

Water Closing Valve

※ This may differ from the product specification.

① Flex pipe on request

② Trap supplied

Drain parts
※ ①, ② one of these will be included.
