

Dignity and Confidence for Everyone

3-in-1 Support Arms

The 3-in-1 Arms is thoughtfully designed to provide both safety and comfort, accommodating a wide range of users—from average to larger builds. Positioned close to the body, it offers support exactly where it is needed most.

With a weight rating of 110 kg, the rail allows users to lower onto the toilet with greater confidence and makes standing up noticeably easier. Rigidly fixed to the toilet pan, it provides superior stability compared to over-toilet frames and remains in place without needing removal for other users.

For added versatility, the handles fold down to assist with wheelchair transfers, and either one or both handles can be removed to suit individual needs.
